Meeting hosted by	Escoles Professionals Salesianes, Institut Politècnic, Barcelona
Minute written by	[LU] Pit Blom and Dennis Douw

Date / Place / Time	Activities / Results / Points of importance
<p>Thursday 05 March 2020 TECHNOLOGY & HARD-WORKING DAY</p> <p>9:30 Leitat Technological Center</p>	<p>At 8:30 we took the bus and drove to the Leitat Technological Center. At the Leitat Technological Center, we first got a short overview of the Leitat Technological Center. They told us what the Technological Center is all about and they also mentioned some of their partners. Then we went to the 3D Lab. In this Lab they print objects with 3D printers for their clients, but they also design and develop new products. Then we went to the research and development department, where Leitat converts their knowledge into something useful for their clients. In other words, they develop new products for their clients, with their own knowledge. They develop and do the research in the following labs: simulation lab, polymers lab, chemical lab, mechanical lab and energy lab.</p>
<p>14:15 Work Line- Plenum</p>	<p>The work line groups held a plenum about their ideas and decided what the different groups need to do.</p>
<p>16:00 Work Line</p>	<p>After the presentations, we sat together as in our groups and started to work on the ideas we discussed in the plenum session.</p>
<p>18:00 Logo vote</p>	<p>Every country designed a logo for the penny press machine and had a vote to decide, which logo will be used for the penny press machine.</p>
<p>20:30 Colour Fountain Montjuic</p>	<p>In the evening we visited a water-light show in Barcelona.</p>
