

# MINUTE OF MEETING DAY

## THIRD PROJECT MEETING IN TRONDHEIM

### EUROPEAN CNC-NETWORK - PENNY PRESS MACHINE FOR EUROPE

<b>Meeting Description</b>	Third Project Meeting in Trondheim (Norway)
<b>Meeting hosted by</b>	Byåsen Videregående Skole
<b>Minute written by</b>	[AT] Patrick Schmid

<b>Date / Place / Time</b>	<b>Activities / Results / Points of importance</b>
<p><b>REVIEW, COMPANY &amp; SIGHTSEEING DAY</b></p> <p><b>Monday</b> <b>15<sup>th</sup> November 2021</b></p> <p>School - Auditorium 09:30-11:00</p>	<p><b>Good Morning – Welcome to Trondheim</b></p> <p>We got some information about the Norwegian school system and about the school itself. For example, we heard about the departments and about the rules at school. Then we got an overview of the PPM4EU project. So, what do we do and what is expected from us. The most important thing is that we always work as a team.</p>
11:00-11:15	Here every team should introduce themselves, so everybody would know who we are working with.
11:15-11:35	During this time we first got reminded that the project language is English. After that each country got to describe their Corona Situation.
11:35-11:45	We were told about the new line Period of our project, that the Deadline is on the 31 <sup>st</sup> of august which is not very useful because most there are holidays at that time. So the real Deadline is either going to be in May or June, to decide when to do the last meeting, everyone should check for dates where they could attend the last meeting.
11:45-12:00	<p>Before lunch we discussed how we should proceed with the project. First of all, we got introduced to the 4 worklines and talked about which worklines could be skipped to be more efficient. Furthermore, we discussed the options to realise the PPM.</p> <p><u>Option 1:</u> All Six countries work together to produce 1 PPM for every country</p> <p><u>Option 2:</u> All Six countries work together to produce 1 PPM.</p> <p><u>Option 3:</u> The Six countries make their own PPM.</p>
13:30-14:30	We visited Sandvik Coromant, they are a tool manufacturer that specialises in dampened tools. They told us about the history of the company and showed us around the plant.
14:45-16:30	After visiting the company, we took a boat trip. First, we went around the city on the sea and then we arrived downtown Trondheim for a guided city tour.
16:30-18:00	Last but not least we took a tour through the historic city where we were told important facts about the history of the city and saw some interesting buildings. For example, the royal residence and a church.
