| Meeting hosted by | Byåsen Videregående Skole |
| Minute written by | Spain |

| Date / Place / Time | Activities / Results / Points of importance |
|--|---|
| <p>HYDRO POWER & LOOKING FORWARD DAY</p> <p>Wednesday 17th November 2021</p> <p>Byasen school 9:00 – 16:30</p> <p>Meteoren School Restaurant 20:00</p> <p>Back to the Quality Hotel Augustin 21:45</p> | <p>Due to Corona restrictions, we were unable to organize the day as planned. We were not allowed to enter the hydro power station with that many people and so the German and the Norwegian coordinators decided to stay in school for that day and move on working on the project.</p> <p>Identifying further steps In groups we discussed and reorganized the further steps of the project work and made up a sketch of who will have to do which part of the work.</p> <p>After lunch we discussed those results from the group work in the plenum and tried to fix all the important decisions as part of the homework so that everyone should know what would have to be done at home until we meet again in Austria in April 2022.</p> <p>As the closing step of the meeting, we all took part in the online self-evaluation provided by the German coordinating school.</p> <p>At about 1:30 we took the bus back to the hotel, had some time to do some shopping and then prepared for the evening when meeting another project group of the European CNC-Network.</p> <p>In the evening we all had dinner together at the school restaurant. Everything had been prepared and served by students and that was a really cosy and relaxed atmosphere.</p> <p>We all took the last bus back to the hotel after a nice evening at school.</p> |
