	[NO] Stian Nordskog
Minute written by	[CH] Adrian Waldvogel

Description of work progress: Topics / Tasks / Results / Decisions / Facts of importance	Responsible school(s) or person(s) incl. deadlines
<p>Plenum We presented our homework and the actual stand of the work group to the other students. We discussed about the parts and the technical drawings. Also, we had a short look at the calculations. In the plenum with the other groups we found out that we are able to control the position of the press roll with the motor.</p> <p>Questions to answer</p> <ul style="list-style-type: none"> • How do we want to synchronize the two rolls to each other? • Do we want to let the coins fall in to the press or will we want a mechanism that push the coins in? • Do we engrave the logos or laser it on the rolls of the press unit? • Can we make the engravings in one of the member schools?
